

# AM I VISIBLE?

## Layout objective:

To help myself discover and understand when I am open and visible?  
And how does this serve me?

## Face down – the advantages.

Surrendering control -

When the cards are invisible to the eye, choosing is random, and therefore in most cases, the card chosen is not necessarily the one that would have been chosen if the cards were visible. Random choice in most cases brings to the surface a real issue that lies under the surface, the invisible which is waiting to be probed.

## What do the word and the picture present in each card?

**The word:** represents the visible layer that is processed in the brain, the straight forward meaning.

**The picture:** represents the subconscious and invisible layer that I will connect or relate to in my inner world.

Now spread the cards facing down and choose three, then discover what opportunities are revealed for you today!  
Arrange them in order and answer each question next to the card.

Enjoy and think what did I learn about myself?

## 1. In what situations am I overt?

## 2. What do I gain by being overt?

## 3. What needs to occur in order for me to be overt all the time?
